

# A Metaverse Built Specifically for Education

An educational metaverse that facilitates interactive experiences which drive engagement, enhance collaboration and foster a sense of belonging.

Teach and learn creatively without the limitations faced when using traditional solutions.

## Drive Engagement

A **virtual learning space** where educators and students can **step in, immerse themselves** and **be naturally engaged** with each other.

- Immersive 3D environment
- True-to-life sound
- In-class participation tools

## Enhance Collaboration

Comprehensive **discussion** and **communication** features that empower **collaborative learning** and facilitate **peer-to-peer** and **student-teacher interactions**.

- Multiple discussion modes
- Content sharing
- Chat & reactions

## Foster a Sense of Belonging

Creating a **healthy** and **safe environment** where students **feel at ease** to **develop personal** and **meaningful connections**.

- Self expression via customizable avatars
- Comfortable learning space
- Safe environment
