

## **ViewSonic Introduces New 4K Ultra HD Series of Commercial Displays with Wireless Screen Sharing**

### *The CDE12 Displays Deliver a Dynamic Communications Hub*

**Brea, CA – INFOCOMM 2022 Booth #N2612 – (June 9, 2022) – [ViewSonic](#) Corp.**, a leading global provider of visual solutions, introduces the CDE12 series of large format commercial displays. Available in four sizes (43, 55, 65 and 75 inches), the CDE12 wireless displays come with native 4K Ultra HD resolution (3840x2160), built-in screen sharing and casting software.

As a large-format wireless presentation display, the ViewSonic [CDE12 series](#) transforms standard meeting rooms into a communications hub. Featuring built-in ViewBoard® screen sharing software, ViewBoard Cast™ (along with the optional ViewSonic vCastSender™ app) and myViewBoard™ display software, the CDE12 displays allow both on-site and online users to participate in meetings and share content.

“The CDE12 series of displays is ideal for a diverse range of signage applications,” said Bryan Phann, Senior Business Line Manager for LFD/Commercial Displays at ViewSonic. “In addition to the features that make the CDE12 displays a great display solution; razor-sharp resolution, wireless screen sharing, wide viewing angles and a Linux Kernel-based operating system, these displays also come with myViewBoard Display, a cloud-based and client-free app that allows users to share their screen from anywhere, making it easier to collaborate with in-person and online users.”

The displays come with a 1.5GHz quad-core embedded SoC processor, 2GB RAM and 16GB of internal memory, which allow CDE12 products to play multimedia from internal storage or a USB flash drive up to 16 hours a day, seven days a week. The displays can be used with a wide array of

signage and messaging applications, with remote configuration and content management system support.

CDE12 displays also include integrated myViewBoard Manager, a cloud-based management solution that empowers IT administrators to remotely monitor devices, manage apps, push out broadcasts and more within the myViewBoard ecosystem. myViewBoard Manager lets IT administrators seamlessly monitor and maintain individual displays across large organizations from a single control panel. The CDE12 displays are also compatible with Extron, AMX and Crestron control systems.

ViewSonic CDE12 displays will be available in June 2022 with estimated street prices of:

- CDE4312           \$649.00
- CDE5512           \$899.00
- CDE6512           \$1,199.00
- CDE7512           \$1,699.00
