Product Description

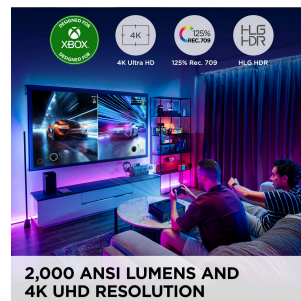

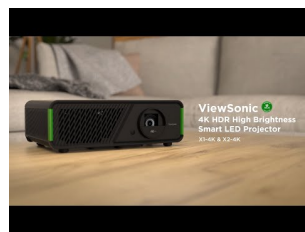

The ViewSonic® X2-4K LED Projector is the world's first projector designed for Xbox consoles. Featuring screen sizes up to an enormous 120" with a native 240Hz refresh rate, this projector delivers immersive entertainment on the largest Xbox gaming display available today. On Xbox X and S consoles, users can immerse themselves in native 1440p resolution at a 120Hz refresh rate for an optimal gaming experience with virtually no lag. The X2-4K projector also supports native 4K Ultra HD resolution at a 60Hz output. Harman Kardon speakers elevate audio soundtracks and help bring a breathtaking aural experience directly to your living room. After undergoing a highly rigorous testing process, the X2-4K was designated by Microsoft as the world's first "Designed for Xbox" projector. In creating this 4K projector, ViewSonic collaborated with Microsoft to optimize compatibility, allowing users to control the projector's power and volume through Xbox consoles using the HDMI Consumer Electronics Control (CEC) standard. CEC not only works with the Xbox X and S but all current gaming consoles as well. The X2-4K projector delivers stunning 4K streaming and offers 1080p resolution with a 240Hz output and a 4.2ms response time for PC gamers, making it the display solution of choice for both casual and professional PC gamers alike. Auto Low Latency Mode (ALLM) minimizes input delay, ensuring lightning fast reactions and gameplay. With native 4K resolution, high refresh rates, immersive audio and seamless compatibility with Xbox consoles, the X2-4K LED projector elevates gaming to new levels of awesome. Play better and watch bigger with the X2-4K Xbox projector today.
